

Milk Dairy Management System

Pragmatic Info Solution makes milk collection process calculation easy. Right from measuring the fat of the milk to make payments to the farmer and generate analytical reports... all the steps are taken care of in the solution.

At village level

- A farmer brings milk to the collection centre.
- The milk is weighed with an electronic scale and weight in grams is converted into litres.
- Fat / Mava of the milk is tested by measuring unit.
- The attendant takes a handy report from that Data Processor and gives a copy to the farmer. The report contains the farmers name, a/c no., type of milk, (cow or buffalo), measurement, fat and rates payable to the farmer.

Features:

In this section we have given an overview of the software like,

- Masters – User / Member / Account.
- Milk Collection Module – Records Transaction of the Collection of Milk.
- Milk Sale Module – Records Transaction of sailing of Milk to Different Customer Types
- Reports – Purchase / Sales / Milk Collection / Shift Collection
- Accounting Reports – Trial Balance / General Ledger / Balance Sheet.

Company Master:

In this master individual Company rights are created and updated depending upon the Nature of the responsibility that user has.

We can define the Company Details – Name, address, Contact details, and Milk Purchase details.

User Master:

- In this master all the details of each and every member is recorded like,
Create Member
Add personal information
Allocate user categories – Supplier/Retail Customer/Corporate Customer
Define Animal Milk Type Purchase for Individually

Purchase Master

- The rate to member can be calculated as per Fat % / SNF / MAVA depending upon the society.
- Only one code number is given to the member for COW as well as BUFFALO. If buffalo milk is taken then 1 is added behind the code of the member and if Cow milk is taken then 2 is added behind the code of the member. Because of which reports can be generated for Cow Milk and Buffalo Milk separately.
- Can wise report is generated,
- Milk Collection summary is seen in the same milk collection form in which the total milk collection i.e. Cow & Buffalo. Cow and Buffalo milk members and also the value of the Cow and Buffalo milk is displayed.
